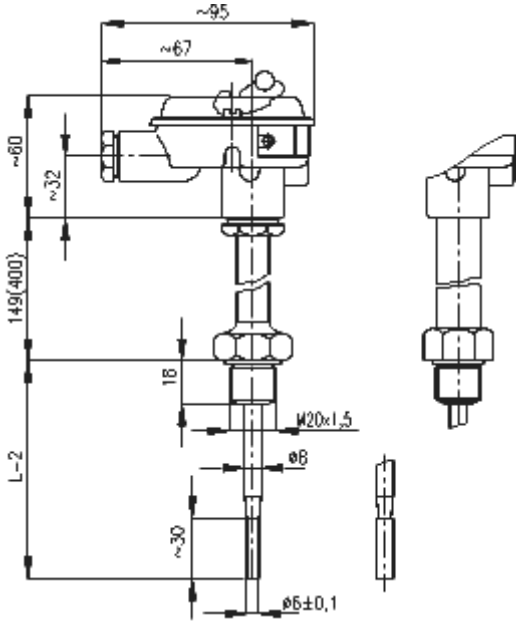
Resistance temperature sensor into well with higher mechanical stability
112 81

Designed for

• the remote temperature measurement of liquids in reservior and pipes where the wells have been already built-in

Advantages

• higher mechanical stability
• possibility of delivery with a strengthen lengthening piece
• possibility of delivery wells according to measuring medium
• the sensor comes with a 24-month guarantee

Technical data


Span [°C]	-70 to 400 (according to a material of the internal wiring)
	-70 to 600 (according to a material of the internal wiring)
Rated length L	160; 250; 400; 630 mm
Tolerance class	B
Type	single or double Pt 100
Protection rating	IP 65
